Question 003 | Question bank page 1 | Q.1

Write a C# program to demonstrate function overloading and constructor overloading using suitable classes and objects.

Project type: C# Console Application

Steps to perform

1. Open Visual Studio and choose Create a new project.

2. Select Console App (C#), choose a project name and create it.

3. Open Program.cs and replace the sample code with the provided C# code.

4. Build the project; resolve any missing using directives or compilation errors.

5. Press Ctrl+F5, enter the required inputs, and verify the console output.

Closest supplied practical: } } Write the program with Constructor Overloading

Source: Dot_Net_Practicals_1_to_5_.pdf

Provided creation instructions and source files

```
Creation steps: Create the Console App named Constructor. Add the listed files at the locations
below and enter the
corresponding code.
Filename: Program.cs    Location: Project root
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
namespace Constructor
{
    class Student
    {
        public Student()
        {
            Console.WriteLine("Default Constructor Called");
        }
        public Student(string name)
        {
            Console.WriteLine("Student Name:" + name);
        }
        public Student(string name, int age)
        {
            Console.WriteLine("Student Name:" + name);
            Console.WriteLine("Student Age:" + age);
        }
    }
    class Program
    {
        static void Main()
        {
            Student s1 = new Student();
            Student s2 = new Student("Rahul");
            Student s3 = new Student("Amit", 20);
            Console.ReadLine();
        }
    }
}
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
namespace Interface
{
    interface IShape
    {
        void Area();
    }
    class Square:IShape
    {
        int side = 5;
        public void Area()
        {
            Console.WriteLine("Area of Square =" + (side * side));
        }
    }
```

```
    class Program
    {
        static void Main()
        {
            Square s = new Square();
            s.Area();
            Console.ReadLine();
        }
    }
}
```

Expected result / verification

The application should meet the exact question requirements. Record actual output or screenshots after running; no execution has been claimed in this manual.
