Question 009 | Question bank page 1 | Q.1

Create a BankAccount class with AccountNumber and Balance properties. Implement validation to ensure that the balance cannot be negative.

Project type: C# Console Application

Steps to perform

1. Open Visual Studio and choose Create a new project.

2. Select Console App (C#), choose a project name and create it.

3. Open Program.cs and replace the sample code with the provided C# code.

4. Build the project; resolve any missing using directives or compilation errors.

5. Press Ctrl+F5, enter the required inputs, and verify the console output.

Closest supplied practical: } Create a class BankAccount with AccountNumber and Balance. Implement property for Balance with validation (Balance cannot be negative).

Provided creation instructions and source files

```
Creation steps: Create the Console App named delc. Add the listed files at the locations below and
enter the
corresponding code.
Filename: Program.cs    Location: Project root
using System;
namespace delc
{
    class BankAccount
    {
        private double balance;
        public double Balance
        {
            get
            {
                return balance;
            }
            set
            {
                if (value >= 0)
                {
                    balance = value;
                }
                else
                {
                    Console.WriteLine("Balance cannot be negative");
                }
            }
        }
        public int AccountNumber { get; set; }
    }
    class Program
    {
        static void Main(string[] args)
        {
            BankAccount b = new BankAccount();
            b.AccountNumber = 101;
            b.Balance = 5000;
            Console.WriteLine("Account Number: " + b.AccountNumber);
            Console.WriteLine("Balance: " + b.Balance);
            b.Balance = -2000;
            Console.ReadLine();
        }
    }
}
```

```
Design a Student Registration Form using the following ASP.NET controls: i. Label and
TextBox to accept Student Name ii. RadioButton to select Gender (Male/Female) iii.
DropDownList to select Course (BSc IT, BSc CS, BCA) iv. CheckBox for accepting Terms &
Conditions v. Calendar control to select Date vi. Button control to submit the form vii. Label
```

Expected result / verification

The application should meet the exact question requirements. Record actual output or screenshots after running; no execution has been claimed in this manual.
