Provided creation instructions and source files

```
Creation steps: Create the Console App named Floydtriangle. Add the listed files at the locations
below and enter the
corresponding code.
Filename: Program.cs    Location: Project root
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
namespace FloydTriangle
{
    class Program
    {
        static void Main(string[] args)
        {
            int n, num = 1;
            Console.Write("Enter the number of rows:");
            n = Convert.ToInt32(Console.ReadLine());
            Console.WriteLine("\nFloyd's Triangle:\n");
            for (int i = 1; i <= n; i++)
            {
                for (int j = 1; j <= i; j++)
                {
                    Console.Write(num + " ");
                    num++;
                }
                Console.WriteLine();
            }
            Console.ReadKey();
        }
    }
}
```

```
Write C# code to arrange the name of cities in sorted order. Accept name of 10 cities from
```

Expected result / verification

The application should meet the exact question requirements. Record actual output or screenshots after running; no execution has been claimed in this manual.
