Question 076 | Question bank page 7 | Q.1

Write a C# program to demonstrate function overloading.

Project type: C# Console Application

Steps to perform

1. Open Visual Studio and choose Create a new project.

2. Select Console App (C#), choose a project name and create it.

3. Open Program.cs and replace the sample code with the provided C# code.

4. Build the project; resolve any missing using directives or compilation errors.

5. Press Ctrl+F5, enter the required inputs, and verify the console output.

Closest supplied practical: } } A) Write the program with Function Overloading.

Source: Dot_Net_Practicals_1_to_5_.pdf

Provided creation instructions and source files

```
Creation steps: Create the Console app named FunctionOverloading. Add the listed files at the
locations below and
enter the corresponding code.
Filename: Program.cs    Location: Project root
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
namespace FunctionOverloading
{
    class Calculator
    {
        public int Add(int a, int b)
        {
            Console.WriteLine($"Add(int, int)called");
            return a + b;
        }
        public int Add(int a, int b, int c)
        {
            Console.WriteLine($"Add(int,int,int)called");
            return a + b + c;
        }
        public double Add(double a, double b)
        {
            Console.WriteLine($"Add(double,double)called");
            return a + b;
        }
        public string Add(string a, string b)
        {
            Console.WriteLine($"Add(string,string)called");
            return a + b;
        }
    }
    class Program
    {
        static void Main(string[] args)
        {
            Calculator calc = new Calculator();
            Console.WriteLine("=== Function Overloading Demo ===");
            Console.WriteLine(calc.Add(10, 20)); //30
            Console.WriteLine(calc.Add(10, 20, 30)); //60
            Console.WriteLine(calc.Add(1.5, 2.5)); //4.0
            Console.WriteLine(calc.Add("Hello, ", "World!"));
            Console.ReadKey();
        }
    }
}
```

Expected result / verification

The application should meet the exact question requirements. Record actual output or screenshots after running; no execution has been claimed in this manual.
