Question 110 | Question bank page 10 | Q.1

Create a web application to demonstrate the use of different types of Cookies.

Project type: C# Console Application

Steps to perform

1. Open Visual Studio and choose Create a new project.

2. Select Console App (C#), choose a project name and create it.

3. Open Program.cs and replace the sample code with the provided C# code.

4. Build the project; resolve any missing using directives or compilation errors.

5. Press Ctrl+F5, enter the required inputs, and verify the console output.

Closest supplied practical: </body> </html> A) Create a web application to demonstrate the use of different types of Cookies.

Source: Dot_Net_Practicals_1_to_5_.pdf

Provided creation instructions and source files

```
Creation steps: Create the ASP.NET Web Application (.NET Framework) named Cookies. Add the listed
files at the
locations below and enter the corresponding code.
Filename: CookiesDemo.aspx.cs    Location: Web Forms project root / code-behind
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.UI;
using System.Web.UI.WebControls;
namespace Cookies
{
    public partial class CookiesDemo : System.Web.UI.Page
    {
        protected void Page_Load(object sender, EventArgs e)
        {
        }
        protected void btnSave_Click(object sender, EventArgs e)
        {
            HttpCookie sessionCookie = new HttpCookie("SessionUser");
            sessionCookie.Value = txtName.Text;
            Response.Cookies.Add(sessionCookie);
            HttpCookie persistentCookie = new HttpCookie("PersistentUser");
            persistentCookie.Value = txtName.Text;
            persistentCookie.Expires = DateTime.Now.AddDays(7);
            Response.Cookies.Add(persistentCookie);
            lblOutput.Text = "cookies Saved Successfully";
        }
        protected void btnShow_Click(object sender, EventArgs e)
        {
            string sessionData = Request.Cookies["SessionUser"].Value;
            string persistentData = Request.Cookies["PersistentUser"].Value;
            lblOutput.Text = "Session Cookie: " + sessionData +
            "<br/>Persistent Cookie: " + persistentData;
        }
    }
}
Filename: CookiesDemo.aspx    Location: Web Forms project root
<%@ Page Language="C#" AutoEventWireup="true"
CodeBehind="CookiesDemo.aspx.cs"
Inherits="Cookies.CookiesDemo" %>
<!DOCTYPE html>
<html xmlns="http://www.w3.org/1999/xhtml">
    <head runat="server">
        <title></title>
    </head>
    <body>
        <form id="form1" runat="server">
            <div>
                <asp:Label
                ID="Label1"
                runat="server"
                Text="User Name:">
            </asp:Label>
             
            <asp:TextBox
```

```
            ID="txtName"
            runat="server">
        </asp:TextBox>
        <br />
        <br />
        <asp:Button
        ID="btnSave"
        runat="server"
        OnClick="btnSave_Click"
        Text="Save cookie" />
        <br />
        <br />
        <asp:Button
        ID="btnShow"
        runat="server"
        OnClick="btnShow_Click"
        Text="Show Cook
ie" />
        <br />
        <br />
        <asp:Label
        ID="lblOutput"
        runat="server"
        Text="Output">
    </asp:Label>
    <br />
</div>
</form>
</body>
</html>

B) Create a Product Table in SQL Server and perform Insert Operation using Entity
```

Expected result / verification

The application should meet the exact question requirements. Record actual output or screenshots after running; no execution has been claimed in this manual.
